

## Company Profile

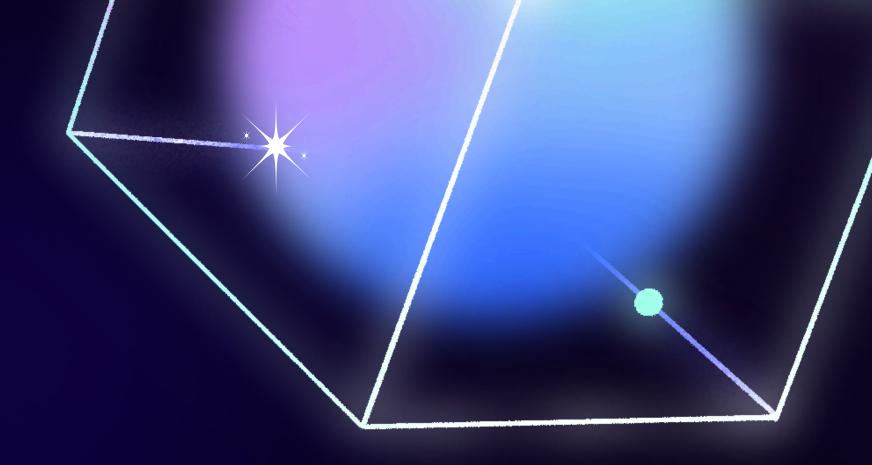

### Introduction

Welcome to Nour 365—where project management meets digital intelligence.

We help organizations turn complex operations into clarity. By uniting proven project & construction management with modern IT, cloud, and light-touch automation, we reduce risk, shorten cycle times, and give leaders real-time visibility. Whether you're delivering infrastructure, scaling a services business, or tightening field-to-finance workflows, we build systems that work the way your teams actually do. Let's turn your next project into a repeatable advantage.

#### About Us

With 20+ years at the intersection of IT operations and project management, Nour 365 builds the digital backbone for predictable delivery. We design clear governance, connect workflows across teams, automate the handoffs that slow execution, and surface leading indicators so leaders see risk early. The result: fewer blind spots, faster closeouts, cleaner audits, and stronger cash flow—project after project.

# Company History Founding Story

We started in Jordan—10 years in a family-run project & construction management firm, delivering building projects end to end—while also running a computer/IT support company for 5 years, sharpening our discipline in service, documentation, and problem-solving. In Qatar, we spent 12 years managing \$100M+ programs under international PMCs, refining the rigor of schedule, cost, risk, QA/QC, and HSE on complex, multi-stakeholder projects.

In 2024, we returned to the U.S. and founded Nour 365 to fuse those two worlds—construction precision and digital operations—into one outcomesdriven practice of Digital Project & Operations Transformation. What this means for you: fewer handoffs, faster decisions, and measurable results—project after project.

#### Key achievements

We lead Digital PM/CM transformations and cloud migrations that turn fragmented projects into connected, data-driven delivery. Results include zero-loss cloud cutovers to secure workspaces, standardized RFI/Submittal flows that cut RFI aging ~60%, look-ahead hit rate ≥85%, and closeout readiness >90% by 75% progress. , while executive dashboards reduced unplanned slips 24% and improved forecast accuracy by 19 points—driving on-time delivery.

## Products and Services

#### Welcome Message

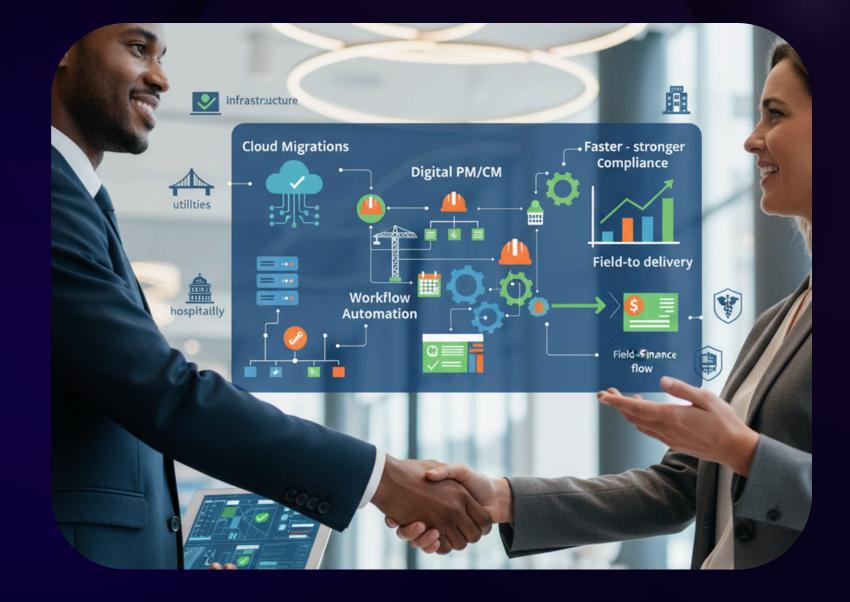

Nour 365 delivers a unified stack for Digital Project & Construction Management and IT Operations. We design your delivery model, execute cloud migrations, automate critical workflows (RFIs/submittals, onboarding, approvals), and connect field-to-finance so data flows without friction. Our offerings span PM/CM execution, cloud & identity governance, Al-assisted workflow automation, and operations & financial performance dashboards—all backed by proven playbooks and KPIs. The outcome: faster, audit-ready projects, lower overhead, and predictable on-time delivery.

## Target Market

#### Market Overview

Nour 365 serves small to mid-size businesses and mid-market, project-driven organizations—including infrastructure owners, general contractors, utilities, municipal programs, and operators in building, hospitality, and healthcare. When multisite rollouts, renovations, or capital programs strain capacity, we replace siloed tools and manual handoffs with a connected operating model: Digital PM/CM, cloud migrations, and workflow automation that create a single source of truth, seamless field-to-finance flow, and audit-ready governance. The result is faster delivery, fewer surprises, stronger compliance, and lower total cost across entire portfolios.

#### Demographics

We serve small to mid-size businesses and mid-market operators across the U.S. (Northeast hub, nationwide remote support with on-site as needed). Typical clients have 10–500 employees, revenue \$5–150M, and capital work in the \$0.5–\$50M per-project range. Core sectors: infrastructure, building, hospitality, healthcare, utilities, and municipal programs—multi-site portfolios that benefit from Digital PM/CM, cloud migrations, and workflow automation to deliver faster.

## Our Vision & Mission

Nour 365 sets a higher bar for how projects run. Our vision is a world where every project-driven company operates on a connected, data-driven model—clear governance, real-time insight, and zero guesswork. Our mission is to operationalize that model by uniting disciplined PM/CM with digital transformation—cloud readiness, secure access, automated workflows, and actionable KPIs—so organizations deliver faster, reduce risk, strengthen cash flow, and scale with confidence.

#### Company Vision

To be the trusted partner that turns complex, multisite programs into connected, data-driven ecosystems—giving leaders real-time clarity and teams frictionless execution, anywhere in the U.S.

#### Company Mission

Design and operate a single, scalable model across projects and back office—Digital PM/CM, cloud migration, secure governance, automated workflows, and program dashboards—to cut cycle time, reduce risk, and improve cash flow on every engagement.

## Achievements and Awards

#### Achievements

Nour 365 has delivered measurable transformation across industries—executing \$100M+ in digital project and construction programs, integrating enterprise platforms to cut redundant workflows by 35%, and driving cycle-time reductions up to 40% through automation and data-driven operations. Our integrated approach to Digital PM/CM, IT modernization, and cloud governance has improved forecast accuracy by 19 points, strengthened coordination across teams, and set new benchmarks for efficiency, transparency, and ontime delivery.

Delivered \$100M+ in multi-sector programs

Executed zero-loss cloud migrations

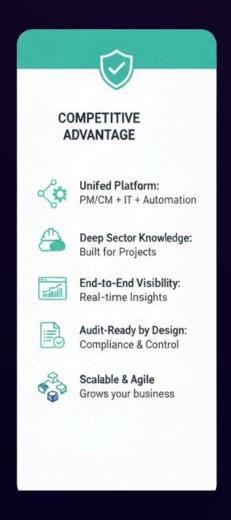

Unified multiple business systems

### Market Position

#### Industry Overview

Project-driven organizations—especially in infrastructure, building, hospitality, healthcare, utilities, and municipal programs—are racing to modernize delivery. Budgets are tight, talent is scarce, compliance is stricter, and work is spread across multiple sites and vendors. Most teams sit on fragmented tool stacks and manual handoffs, which erode schedule certainty, cash flow, and audit readiness. The winners are standardizing on cloud, automating routine work, and managing by leading indicators (not lagging reports) to create a single, trusted view of progress and risk.

#### Competitive Advantage

Nour 365 sits exactly where Digital PM/CM meets IT Operations. We replace silos with a connected operating model: one source of truth, role-based governance, automated workflows from field to finance, and executive dashboards that surface risk early. Our playbooks launch in weeks (not months), scale from pilot to portfolio, and deliver measurable gains—lifting look-ahead accuracy, accelerating closeout, and compressing cash cycles. Backed by 20+ years across complex programs, we provide nationwide remote support with on-site as needed, turning plans into predictable performance.

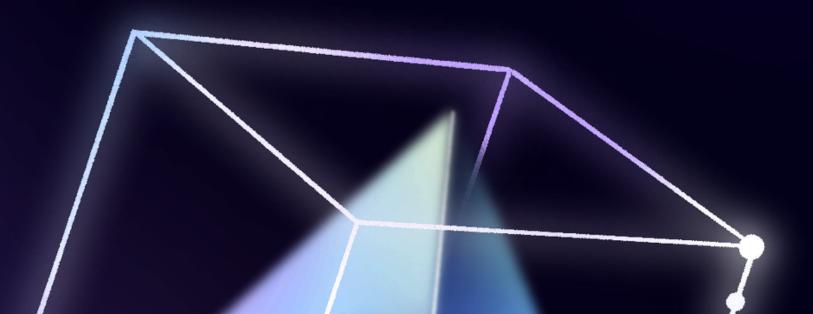

### Key Point

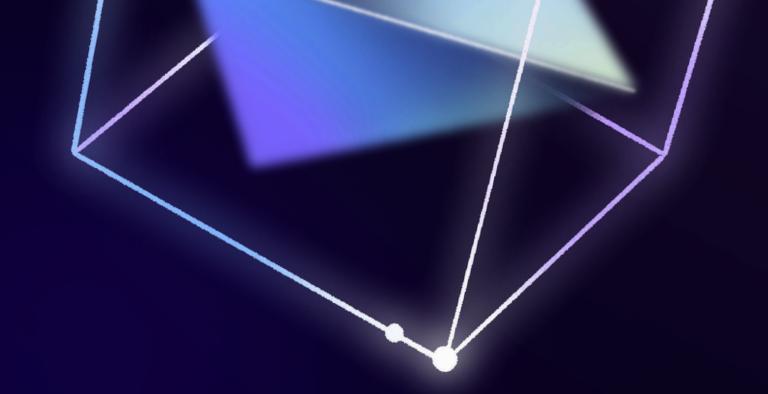

#### Conclusion

Nour 365 is your force-multiplier for execution. We align strategy, delivery, and technology into one operating model that removes friction, surfaces risk early, and gives leaders unambiguous signal. Secure-by-design governance, automated handoffs, and clear performance markers create compounding wins—faster cycles, cleaner audits, steadier cash, and teams focused on work that moves the needle. We start small, prove value quickly, and scale confidently across your portfolio. If you're ready to trade busywork for clarity and momentum, Nour 365 is the partner to make it happen.
